

FOREWORD

International Journal of Bioelectromagnetism (IJBEM) Vol. 14 No. 3 collects papers from regular submissions, peer reviewed and accepted for publication. This issue includes wide variety of novel methodologies to analyze EEG, ECG or heart rate fluctuations.

Paper submission for this issue is promoted by the IEEE Technical Committee of Biomedical Signal Processing. Active commitment of the committee members in the extensive review process is appreciated.

We hope that the contributions included in this IJBEM issue will be interesting to researchers from different areas of bioelectromagnetism.
